

What is Rubric Infringement?

A rubric infringement occurs when the candidate does not follow the instructions set out for the particular paper or task. For example, instead of answering one question out of three optional questions, the candidate answers more than required, either two or three questions, or the candidate underlines two choices when only required to underline one.

What is the rubric of the paper?

The rubric is the instructions provided to candidates at the beginning and/or throughout the question paper/task informing candidate about the questions to answer and how to answer specific questions or tasks.

How should we assess work where the candidate has not followed the instructions provided?

The table on the following page provides a list of types of rubric infringements which could occur within the CCPLD suite of qualifications. The table also provides a common approach to dealing with each type.

| | Type of infringement | Example | Action/Instruction | By whom? | Outcome/additional notes |
|---|--|---|---|--|--|
| 1 | Ticking/indicating more than the stipulated number of answers (MCQ paper format) | Select one answer from the list of 4 possible answers | | WJEC examiner Or internal staff for papers versions mock papers | MCQ papers include 50 onemark questions. E.g. circle one correct answer. The candidate has circled two. Award no marks. The examiner cannot determine which answer is correct. |
| 2 | Where the candidate has crossed out the correct answer | | Do not mark anything that has been crossed out | Assessor/tutor/examiner | Only award marks for answers which hasn't been crossed out and visible to mark. |
| 3 | Where the question requires a set number of responses and the candidate has provided more (open ended knowledge and understanding questions) | Explain three ways outdoor play can enhance development | Mark any correct answers provided up to the maximum mark | Assessor/tutor/examiner | Where the question requires three ways, if the candidate provides six ways, four of which are correct, the candidate should be awarded the maximum three marks |
| 4 | Where the question requires a set number of responses and the candidate has provided more (application of knowledge and understanding in an instance where there is a smaller number of correct answers) | State 3 areas of development | Award one mark per area of development listed. There are only a set number areas of development, that could be referred to. | Assessor/tutor/examiner | Award one mark per correct answer. |
| 5 | Answering an English medium question paper or case study in Welsh or a Welsh medium question paper or case study in English | | Mark response where able to or escalate for the attention of welsh medium assessor/tutor | Assessor/tutor/examiner | Marks awarded as per mark scheme |
| 6 | Answering a question in the wrong place in the answer book | | If it is obvious which question is being answered, award marks for any correct response. Do not double credit by awarding marks in two places for the same response. | Assessor/tutor/examiner | Only credit marks for the response where the learner has indicated it is in the wrong place e.g. arrows numbering changed |

| 7 | Learner produces too many pages of notes to take into the question bank test | 3 or more sides of A4 notes | Explain to the learner that they can only take 2 sides of A4 notes into the question and request that they need to leave one side out the controlled assessment room | Assessor/IQA/Learner | Only allow 2 sides of A4 notes |
|----|---|--|---|----------------------|--|
| 8 | Learner produces notes on case study and standalone notes to use when sitting the question bank | Notes on case study and standalone notes produced by learner | Explain to the learner that they need to select which set of notes they would like to take into the question bank and disregard the remaining set | Assessor/IQA/Learner | Only allow one set of notes |
| 9 | Learner changes mind over method of recording answers to question bank (Written or typed) | One day of question bank, learner explains they would rather complete the question bank in typed format rather than written format as previously agreed | Centre should try and encourage the learner to select the method prior to the question bank day to ensure the centre has made adequate arrangement for hard copies or onscreen copies of question bank. The centre should try and accommodate the late request if possible. | Assessor/IQA/Learner | Centre to try and accommodate the preferred method of recording the question bank answers |
| 10 | Learner finishes question bank ahead of time and asks to leave the controlled assessment room | Learner complete question bank ahead of allocated time and asks to leave the controlled assessment environment | Centre should encourage learner to check question bank paper and confirm they are happy to leave to controlled assessment room | Assessor/IQA/Learner | Learner needs to confirm they are happy to leave the controlled assessment environment and from this point they cannot make any further amendments to the paper |
| 11 | Learner has not completed the question bank paper in the allocated time | Learner has requested additional time to complete the remaining unfinished questions | Centre should remind learners prior to start of assessment that they have 1 hour to complete the question bank paper. As good practice, the centre should prompt learners of remaining time left of assessment and display a clock/watch to keep track of time | Assessor/IQA/Learner | Centre should ensure that the allocated time for assessment is adhered to. |
| 12 | Learner does not return hard copy of case study on day of assessment | Learner with holds the case study | Prior to releasing the case study to the learner, the centre should instruct learners that the case study needs to be returned to centre on day of assessment and not shared or copied | Assessor/IQA/Learner | Centre should brief all learners that the hard copy case study should be returned to centre on day of assessment and disposed of correctly (if not used of revision notes) |
